Re: NEIC Database
Coordination

Attention: Mr. Steven Kinser
Remedial Project Manager

Gentlemen:

Reference is made to the August 3, 1987 meeting between yourself and the REM IV team held at your offices. During this meeting you requested the REM IV team provide assistance in coordinating the REM IV generator listings with the NEIC-developed PCB item processing computer database.

During the progress of the coordination efforts, our Ms. Jan S. Walstrom met with Mr. Ruben McCullers of your office on August 5 to review information concerning generators listed on the NEIC database printout dated July 30, 1987. A listing of specific revisions required for selected generator entries in the NEIC database was developed. The revisions are presented in Attachment 1, titled "Martha C. Rose Chemical Company, Summary of August 5, 1987 REM IV-NEIC Database Coordination Efforts".

Additionally, Mr. McCullers requested that the REM IV team provide the names of generators and their associated manifest numbers which are found in the REM IV generator listing but do not exist in the NEIC generator listing. A listing of these generator names and their associated Rose manifest numbers are presented in Attachment 2, titled "Martha C. Rose Chemical Company, Additional Generators for Inclusion in the NEIC Database". Please note that the generators named in Attachment 2 were not included in the NEIC database since the documentation used to prepare the data entries consisted of only the Rose Chemical material logs.
